SOME TALK ON THE MILLER REFINERY

A number of the resolutions presented to Select Councils were also placed before Common Councils. Mr. Stayton wanted Coun cils to declare the Miller oil refinery a nuisance, but after considerable talk it was decided to be a question of the courts, and his motion was held over.

Mr. Neeb asked for a place in the parks for the Armstrong monument and the vaca-tion of the sidewalks on the east and north sides of the Carnegie Library. Mr. Mc-Donald wanted the Perrysville road from the head of Federal street to the property of Jacob Born condemned.

ABOUT THE MAYOR'S TERM.

Mr. Stausser presented a resolution providing that the City Solicitor be requested to prepare an opinion for the next meeting of Councils, stating as to whether the term of the Mayor expire in 1890 or 1891.

Mr. McGeary presented a proposition from the Pittsburg Company to furnish the city with pure, wholesome water. The company propose to furnish the city with filtered water for 20 years at \$50,000 per year. They reckon that it will be cheaper than extending the supply pipe to Nine-Mile Island. The latter plan at the estimated cost of \$1,500,000 would, bonds being issued at 4 per cent, cost the city \$60,000 per year. The matter was referred to the Water Committee.

The object of the expedition is to observe the total eclipse of the sun which with him to New York, where he went into will occur on December 22. Dr. Holland himself first originated the idea of sending an expedition to Africa to make solar observations, and the Hon. John Dalzell succeeded in having a bill passed providing for the expenditure of \$5,000 on the proposed journey. This amount now proves inadequate; but the Secretary of the Navy has promised to place one of the new cruisers at the disposal of the expedition, thus remov-

MORE ARRESTS LIKELY TO FOLLOW.

The Very Remarkable History of One of the Women in the Case.

TRIED FOR POISONING HER FAMILY

The arrangements for the hearing of the defendants in the May Sullivan case from Scottdale are being pushed on both sides with vigor. Counsel have been secured on issue of \$1,000,000 worth of 4 per cent bonds the part of the defendants, and as far as to be used in improving the highways of the known W. J. Brennen will represent Jacob A. Babbs, the principal in the case, and William Hunter the accessories, Florence Donelson and Laura Bailey.

Florence Donelson is a woman with history. She was a Florence Van Fossen. of East Liverpool, where in February, 1885, she was arrested on a charge of poisoning her whole family. Her father was in the grocery business and in good circumstances. The whole family, except three, was taken ill one evening with symptoms of poisoning cousin of Florence, died.

The hired girl was accused of the crime, but proved her innocence, and a search of the premises showed the presence of drugs in Florence Van Fossen's boxes, which would produce the symptoms indicated by the diagnosis of the sufferer's case. She could not account for the presence of the drugs, was arrested and placed in jail where she was held for five months.

THE EVIDENCE IN THE CASE.

The evidence against her at the trial, which lasted a week, was that she had prepared the coffee on the evening of the poisoning, and that the symptoms of those affected were those of arsenical poisoning, herself being but slightly affected, while the hired girl and two children, who drank ten, were unaffected. The remains of the child who died were exhumed, and traces of arsenic found in the stomach. Florence was acquitted after nearly ruining her father financially in paying for counsel and other legal expenses.

Shortly after her acquittal she started for Pittsburg, where she entered Ada Criss-well's disorderly house on Second avenue, where she stayed until March 1887, when she married W. M. Donaldson, a traveler, corner of Sixth avenue and Four-teenth street. She lived with him for about a year or so and drifted back into her old ways, living in New York until some two months ago, when she returned to Pittsburg and entered the house of Laura Bailey, 111 First avenue. Her story is adventurous and roman tie enough in some respects to furnish Zola with material for a new and probably worse novel than he has yet produced, for in ad-

dition to her other excesses she admits the free use of opium. Inspector McAlcese considers this woman to have been rendered almost irresponsible

through her excesses. HILL FEELS HIS POSITION. Probably one of the most important witnesses in the case when it comes before the courts will be Frank Hill, who feels keenly his position, and considers himself aban-doned by Babbs and those who should have taken his part. Detective Demmel, of the Pittsburg police force, is close on the heels of another man implicated in the case named Harrington, who has skipped for Ohio, and a number of other arrests may be expected to-day or to-morrow, so that it is unlikely the hearing will take place this

#### TOO HOT TO WORK. A New Argument Advanced by a Window

Glass Manufacturer-He is Sorry He Started So Early in the Senson. The work on the second tank in Chambers and McKee's window glass house at Jeannette will begin Monday next. It will give employment to 60 more blowers, and will inrease the capacity of the works to the equivalent of 138 pots. It is stated that the

class made in the first tank is not equal to pot-made glass, it being "cordy" and stringy. There was no change in the window glass strike vesterday. A manufacturer, who also operates a green bottle house, said: "The statement published yesterday that all the Pittsburg manufacturers would be making window glass in one week is prepos-terous. It would take ten days to get the furnaces in shape, and I know positively that no work has been done on the furnaces.

There is not the slightest probability that any glass will be made before October 1. "This weather is too warm to work, and i would be a loss to us to start up. Our bottle factory has been running two weeks, and in that time the men have not done one full day's work. It is so hot in a glass house now that the men cannot put in full time and have to losf around outside of the factory. We have to pay the gatherers and other help the same wages as if the blowers made full time, and this is losing money. We are now sorry we started up when we

Thirteen of the Objectionable Men Went Into the Union. The ice wagon drivers and helpers have decided not to strike. At the meeting of L. A. 7482, Knights of Labor, in Seibert's Hall, last night, this action was taken. Thirteen of the men who were not members of the union, and over whom the trouble was caused, were initiated into the Assembly. All the men are employes of the Chautauqua Ice Company, but there are others on the Southside, who have not yet ex-pressed a desire to join L. A. 7482. If these men do not come a strike may yet result. Master Workman John O'Shea stated last

A committee from the horseshoers' union was present, and stated that their strike was not yet settled. All of the master shoers had not signed the scale, and those who had not done so were turning their work over to the employers who had. A committee of L. Rents and Other Expenses.

George W. Guthrie yesterday went to the Controller's office and said that having read the published interviews with Chief J. O. Brown, of the Department of Public Safety, regarding the transfer of Central station from its present position to the Monongahela wharf, he thought some mistake must have occurred. He had not notified the department to move from its present place by April 1, and was willing to renew the lease on existing terms. This occasioned some considerable talk, and as the necessity of re-

moval was one of the reasons urged for the establishment of a Central station on the new site the matter was investigated. Chief J. O. Brown, when questioned re garding the subject and informed of Mr. Guthrie's statement, said: "We cannot continue in such cramped quarters as these and pay rent for a number of places to accommodate the various requirements of the bureau. We require better accommodations, and by getting them in this way the city can be saved a large amount of money. As for Mr. Guthrie's statement I know nothing about that, as Superintendent Weir

year to year. He thought that the city could not afford to remain a tenant at the will of a private landlord, liable to have its rent increased or to be ordered out on due notice. This was all he had to say on the subject. Chief Bigelow of the Department of Publie Works was absent from the city at Gettysburg, but questions to various officials showed that he was known to object to the whole whar age of the city being absorbed by buildings. Controller Morrow was asked what he thought of the subject but said he did not ike to express an opinion just now. He agreed that the Central station should not alone be centrally located, but much improved upon its present condition, and admitted that a saving of rent would result say one word to condemn it, giving as his reason that further on he may be required to act in the matter, and did not wish to
